About me

Ever since I was a child, I have been always interested in programming. When I was 15, I started making games for fun in Unity/C#, and continued to do so to this day. When I finally started to learn how to program properly in university, I realized that this is my passion. So I'm excited to finally try myself out in a professional setting and work with like-minded people.

Education

- **ELTE IK BSc:** On my fourth semester of the Computer Sciences curriculum
- Kossuth Lajos Bilingual Vocational Secondary School of Technology

Skills

- Experience with **Linux**, **SSH**, and **Git**
- Experience with programming languages and related concepts:
 - Vanilla **JavaScript**
 - **CSS** and **HTML**
 - **PHP**
 - GUI applications in **Java** Swing
 - **Python** for mathematics and networking
 - **C** and utilizing low-level memory management
 - CLI RPG game developed in **C++**
 - Basic **SQL** and handling databases
 - Functional programming knowledge from **Haskell**
 - **Unity** prototypes in **C#**
 - Unit testing
 - Clean Code
 - Object oriented programming concepts
- Currently learning
 - ReactJS
 - OpenGL with C++ for Computer Graphics

Languages

- Native Hungarian
- C1 English
